

inhus bespoke:

At inhus we understand that our customers would like an inhus built to their own requirements. To show you an example of how far you can go with inhus below is a “small” contemporary designed, for a customer with the need for extra space and attached to their existing premises.

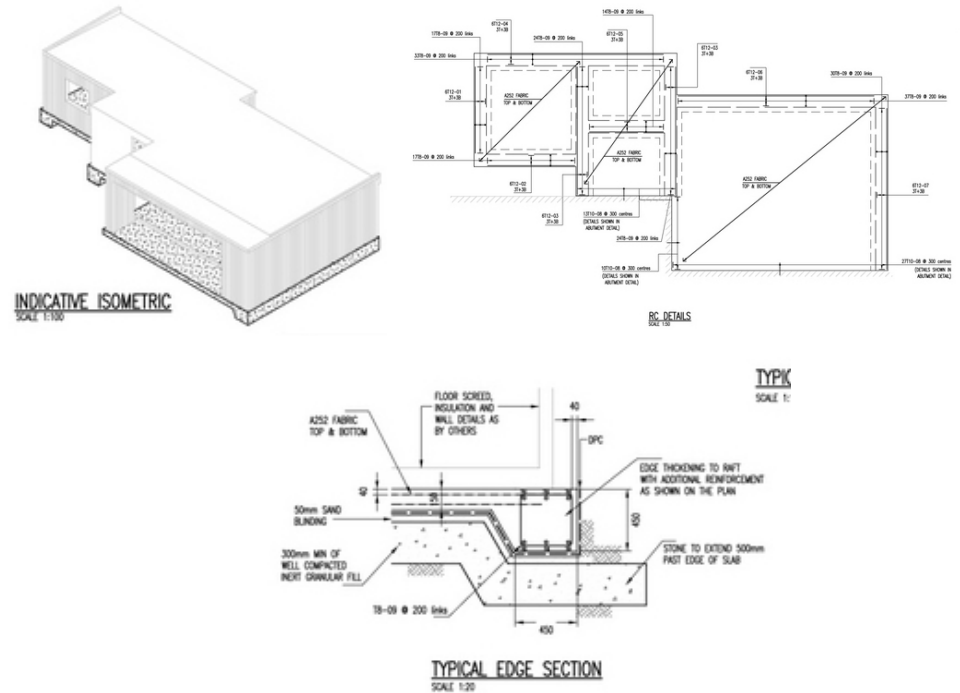

The design and layout was greatly influenced by the owners' personal requirements.

This inhus is attached to an existing property, close to the entrance hall door.

inhus stress calculations:

We use a variety of specialists when designing a bespoke inhus. We have a commitment to our customers to ensure that the inhus buildings comply to all regulations and in many cases are over the required specification used within UK building regulations. We used the latest materials and are not afraid of incorporating new and innovative systems of any type.

inhus Consultancy:

We offer the customer a one-stop shop, from design to 3D CAD model, through to planning & consent and finally stress calculations and build. Timescale for such projects depends normally on size on build.

Call Freephone 0800 0699936 for details.
